

PRODUCING YOUR **VISION**

cesstudioservices.com

YOUR **TRUSTED** PRODUCTION PARTNER

Starting business in Los Angeles as Base Craft in 2001, we now have the backing of CES Power, one of the largest global temporary power providers. Together, we've created CES Studios Services. The same knowledgeable team and quality equipment, with added value from other CES divisions and the investment and support we need to keep growing.

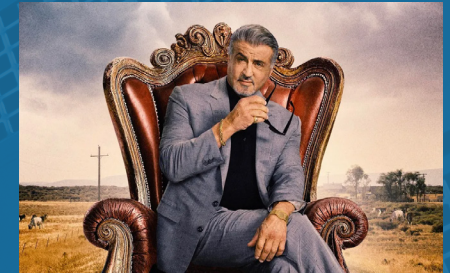

With over 24 years' experience in the film and TV industry, our expert team are well placed to support your productions across the US with a huge range of specialty equipment.

We have a full range of high specification production support equipment to keep your studio or location working no matter what, so your cast and crew can focus on telling the stories that matter.

A SMALL SELECTION OF OUR PRODUCTION CREDITS

Bad Boys: Ride or Die

Tulsa King

Avengers

12 Years a Slave

The Vampire Diaries

Dallas Buyers Club

THE HIGHEST STANDARDS OF SERVICE

Our team are industry veterans, experienced in a broad range of film and TV production projects across the US.

Whether you're shooting the next big blockbuster, a TV commercial, or anything in-between, they can help make the job easier for your cast and crew.

All our equipment is serviced and maintained to the highest possible standards in our own on-site shops, by our expert engineering teams. All our trailers and vehicles go through regular upgrade programs to ensure we maintain the highest possible standards to support your cast and crew.

WHAT YOU CAN EXPECT FROM CES STUDIO SERVICES

- **Expertise and advice** to support your production
- **24/7 support** and emergency response
- **Added value** on sustainability
- **Flexible solutions** to meet evolving challenges
- **Highest possible standards** of maintenance across our fleet
- **Focus on health and safety** always

SUSTAINABILITY

We're committed to not only reducing our own operational impacts but also doing our part to help you to reduce the environmental impacts of your productions.

As a responsible supply chain partner, we have a range of solar and battery powered options, and a number of other initiatives we're implementing to help you reduce your environmental impacts.

MORE EFFICIENT FLEET OPTIONS:

- **Electric vans** for transporting cast, crew and equipment. Plug right into base camp
- **Solar and battery powered** cast trailers
- **Studio silent**, battery powered generators
- **Rigorous maintenance and repair** ensures our entire fleet operates at it's peak

RESPONSIBLE OPERATIONS:

- **Minimizing packaging** and recycling as much as we can
- **Training programs** at our depots ensuring our team do their part
- **Energy saving initiatives** in place at our locations

ADDED VALUE FROM CES

CES is made up of four divisions, so you get the benefit of these expertise, with the same great service and team.

CES TECHNOLOGIES – TEMPORARY WIFI NETWORKS AND CCTV

Wherever you're working, we know the value in staying connected, and our CES Technologies team are experts in building and managing temporary networks in a huge range of challenging conditions.

- **Full network planning** and deployment services
- **Location planning tools** for larger or more complex sites
- **Multiple WIFI** access points

Site security is paramount, so we can set up your shoot locations with a comprehensive CCTV solution that takes the worry away. You'll get real-time visibility via industry leading camera and software solutions, all backed up with the expert knowledge of our team.

- **PTZ and fixed focus** cameras
- **Industry leading** VMS
- **Experienced operators** used to working alongside law enforcement

ADDED VALUE FROM CES

CES POWER – SPECIALIST POWER & HVAC SOLUTIONS

CES Power have over 25 years' experience powering events and projects across the US and beyond.

Our high specification generator fleet can power a host of requirements across your studio or location, all available whisper quiet so nothing interrupts your shoot. Backed up by our cable and distribution services, we will make sure that power gets to every corner of your site, maximizing the power you need to work, but reducing your overall emissions and generator requirements.

Our expert team are on hand 24/7 for engineering support, and we can even take the work out of managing your fuel levels by doing this all for you. We offer a full range of contingency planning services and uninterrupted power supplies, so you're never left without the power you need.

- **Generators** 2-1000KW.
- **Battery and solar powered** options to reduce emissions.
- **Expert advice** from our sales and engineering teams.
